SuperPro

❈ BETTANIN

Our Story

SuperPro commenced its trajectory in 2002.

Still as a business unit of the company BETTANIN, there was a great acceptance for its professional cleaning solutions, in addition to the growth of this market.

Thus, in 2009, SuperPro gained autonomy, recognition for its technology and national and international relevance becoming a company of the solid InBetta group.

Nowadays, SuperPro has the largest line of professional cleaning products in the market, growing more and more each year, in product mix, market coverage and customers served throughout the country.

Floor disks are based on synthetic fiber and each abrasiveness is differentiated by one color (darker to clean and remove, lighter to buff and polish).

This line caters for all steps of floor treatment, from removal and cleaning to polishing and restoration, as well as varying sizes, adapting to various types of floor polishers.

DISC COLORS ALSO INDICATE THEIR FUNCTION:

DARK DISCS:
Designed to clean and remove surface dirt.

LIGHT DISCS:
Designed to sleek and polish surfaces.

GREEN CLEANER

All types of floors except the most fragile such as porcelain tiles. Made abrasive in its composition, facilitates the removal of superficial layers and impregnated dirt.

Produced according to advanced technological standards, they allow for use in various areas, such as sheet metal floors, ovens, and industrial stoves. There are more than 10 types of fibers, each specific to a surface type or degree of dirt. Fiber holders are ergonomic and easy to handle, with variations which allow them to be used with or without handles, facilitating cleaning on surfaces with varying temperatures and ranges, as well as ensuring the safety and welfare of the user.
